**GOLDRAY**  
GLASS

ARCHITECTURAL GLASS & SYSTEMS

# Inspire Innovate Execute

Collaborating with architects, designers, and installers, Goldray Glass designs and manufactures architectural glass and systems that inspire. We've built a reputation for fostering creativity and delivering customer centered solutions focused on making it easy for you to create spaces that are unique. We are proud to provide glass; a durable, beautiful, and easy-to-maintain product that works to transform buildings into icons.

# Solid Color

Goldray's Solid Color palette has been curated in step with popular design trends, with both opaque and transparent options.

Glass is a durable and diverse building material that can feature a range of colors and textures. The Solid Color collection offers flexibility, making it one of the most versatile methods of bringing designs to life.

SWITCHABLE PRIVACY 7

# Privacy

Full privacy, partial privacy, or switchable privacy – we have all the options! With our QuickFrost™ system, you can switch from fully opaque privacy glass to transparent non-privacy glass at the flick of a switch. Other privacy options include textured glass, frosted privacy bands, fades, and patterns.

# Patterns

Stripes, dots, geometric, fades, and abstracts should cover all your dreams and hopes of finding the perfect look. With options from subtle to full-coverage patterns, we invite you to push conventional boundaries by incorporating something a little different into a space. Goldray's Patterns are also perfect for creating privacy while maximizing the room's natural light. This will make your space stand out in the most cost-effective and reliable way. Our designs can be placed on transparent glass or combined with glass from our other lines. Often seen on doors and walls, room dividers, backsplashes, and feature walls, patterns on glass can add privacy, security, and safety to a room, making for a more pleasurable experience when the space is shared.

PRINTED

ANTIQUE MIRROR ↗

# Reflective

Reflection can do amazing things like making a room feel bigger and brighter. Our Reflective collection provides you with options beyond the everyday mirror. Using tinted, frosted, or antique mirror gives all the benefits of regular mirrors but adds a spark of creativity and unique flair. Combine any Goldray mirror with other products to increase safety qualities or create something new and exciting (...or both!)

# Woven

Adding texture to a design while keeping surfaces sleek and easy to clean has never been easier. Laminating metal mesh or fabric between glass creates a strong, yet elegant look that instantly makes a room extraordinary.

Mesh interlayer options include copper, aluminum, bronze, and gold finishes, as well as coarse, diagonal, and fine weaves. Fabric options are entirely up to you! We invite our customers to source their own fabric in any texture, color, print, or pattern.

Suitable for interior or exterior applications, this dynamic collection can be used almost anywhere.

WOOD ↗

# Naturals

Have the look of wood, stone, or rice paper with the durability and flexibility of glass. Embrace the versatility and strength of glass to mimic nature, allowing for elegant beauty, visual delight, and durable functionality. Using a digitally printed version of these materials means you can match existing materials, create stones or woods in unique colors, and design the look you want without having to mine more materials from the earth. Be beautiful and environmentally friendly at the same time!

# Marker Boards

Glass marker boards allow you to have it all; beautiful, collaborative, and creative spaces.

Prefer to write with chalk? No problem. Glass chalk boards give the traditional feel of the classroom with an easy-to-clean and long-lasting finish.

Incredibly customizable, glass marker boards bring a modern elegance that is also functional to any room. By incorporating walls that are colorful, durable, writable, projectable, and magnetic, your space becomes truly multi-functional.

# Graphics

Graphic Glass puts you in the driver's seat, using our innovation to bring your inspiration to life.

With our Graphics products, you are in control. Goldray will create durable, easy-to-install panels with your artwork to get the effect, look, or function that you need. You curate the art; we'll provide the canvas.

Is it a beautiful photograph? Your company's logo or value statements that you want to feature in your boardroom or lobby entry? Whatever your vision, all you need to send us is your design file.

## CUSTOM IMAGES

# Dichroic

Dichroic Glass swings the doors to creativity wide-open. This dynamic glass brings the dance of brilliant color shifts into a space, incorporating natural light into the design while taking advantage of both transmitted and reflected light changes. Depending on where the sun is sitting, its translucency allows for light to pass through and cast colorful shadows all around a room and onto the ground as well.

Design options can include using this as a single pane of glass, or combining it with printed patterns or laminated meshes to create a striking and unique feature piece that will elevate any space with dramatic effects.

# Corning<sup>®</sup> Gorilla<sup>®</sup> Glass

Remarkably tough and incredibly thin, Corning Gorilla Glass enables progressive new lightweight designs with excellent optical performance for interior architecture.

At only two millimetres thick, Gorilla Glass is a thin, yet highly durable alternative to traditional architectural glass panels. Perfect for weight-sensitive, high-traffic spaces like elevator interiors, where panels must withstand occasional impact without sacrificing style.

# Bird-Friendly

Highly reflective surfaces like glass are responsible for bird collisions affecting up to one billion birds every year in North America.

Bird-friendly glass patterns incorporate sophisticated designs and are becoming an integral component of pleasing architecture.

Goldray's designs are all compliant with CSA guidelines, covering bird-friendly building design in both new construction and existing buildings, and are intended to reduce bird collisions with buildings.

# MOSAIC Wall System

MOSAIC is a prefabricated system allowing you to mechanically adhere glass much quicker than you would with traditional methods.

The MOSAIC cladding system can get projects completed TEN TIMES faster, with less fuss and stress – and increased savings in time and money. This innovative framed system comes out of the box finished and ready to hang into place. No cure time. Simply measure the space, order the glass type, and hang when delivered on-site - saving you time, money, and project stress.

# NOVA

## Wall System

Meeting the demand to manage weight, durability, and innovative design concepts, Goldray Glass developed NOVA. This is where the life-proof rugged durability for everyday living intersects with sophistication and unquestioned beauty.

The NOVA panel system is designed with a lightweight aluminum honeycomb backer, creating a rigid, fire-resistant surface for decorative wall panels that stand out and stay put. This system is solid, sturdy, and is up for the challenge that any high-traffic space can throw its way.

In Goldray's system offering, NOVA is often chosen in combination with Corning® Gorilla® Glass, because when used together in typical high-impact areas such as elevators and lobbies, the overall beauty and maintenance cost savings benefits are out of this world.

# About Goldray Glass

Over 35 years ago, Goldray was founded with a mission to help shape the future of construction by challenging ourselves to create something better than what exists.

We are dedicated to innovation, collaboration, and to saying “yes – we can do that.” We like to make things easy for our customers.

Located all across North America, a Goldray Representative is ready and waiting to assist with options so you can achieve your design intent. At headquarters, a group of glass experts look after your project details, while a team of craftspeople breathe life into the glass.

Together, we make every project breathtaking.
